

TECHNICAL INFORMATION

ORIGEN CHF S300 plus Synthetic Central Hydraulic Fluid

DESCRIPTION

ORIGEN CHF S300 plus is a synthetic hydraulic fluid developed for self-levelling systems fitted on passenger cars, SUVs and some off-road vehicles. This product is also suitable for certain power steering's, shock absorbers, m/cycle forks and hydraulic systems requiring low viscosity fluid. **ORIGEN CHF S300 plus** is formulated to a very high viscosity index enabling smooth operation over a wide temperature range (-40°C to +140°C).

APPLICATION

ORIGEN CHF S300plus is specially developed for all modern vehicles with self-levelling suspensions. Also suitable for some power steering's, bike forks, forklifts and hydraulic systems that require low viscosity fluids.

BENEFITS

- Excellent lubricity ensures reduced wear.
- Exceptionally high viscosity index ensures smooth operation at extreme temperatures, ranging from -40°C to 140°C.
- Very good combination of corrosion inhibitors, anti-wear agents and metal passivators.

TECHNICAL CHARACTERISTICS

Density at 20°C kg.m-3	0.835
Viscosity at 40°C cSt	18
Viscosity at 100°C cSt	5.9
Flash Point °C	319
Pour Point, °C	-50
